Elena Rostova

Technical Lead & Staff Machine Learning Engineer | elena.rostova@example.com | (555) 234-5678

Professional Summary

Accomplished engineering leader with 11+ years experience architecting scalable distributed systems and LLM pipelines. Led cross-functional teams of 15 engineers in production deep learning and NLP deployments.

Technical Skills

Python, PyTorch, Transformers, NLP, Machine Learning, FastAPI, Kubernetes, Docker, AWS, PostgreSQL, CI/CD, System Design

Work Experience

Technical Lead & Staff ML Engineer — Cognitive Scale AI (2020 - Present)

- Spearheaded multi-tenant RAG systems processing 20M queries daily using Hugging Face Transformers and PyTorch.
- Managed team of 14 machine learning engineers and DevOps specialists.
- Architected high-throughput inference APIs using FastAPI and Kubernetes on AWS.

Senior Machine Learning Engineer — DeepData Systems (2015 - 2020)

- Engineered end-to-end NLP classification pipelines with 94% precision.
- Implemented CI/CD automation and containerized model training workflows.

Software Engineer — Apex Analytics (2013 - 2015)

- Developed backend data ingestion pipelines in Python and PostgreSQL.

Education & Certifications

- Ph.D. in Computer Science — Stanford University
- AWS Certified Solutions Architect
- TensorFlow Certified Developer
